

# Invisicom™ Broadcast Earpieces

By Hearing Electronics Ltd

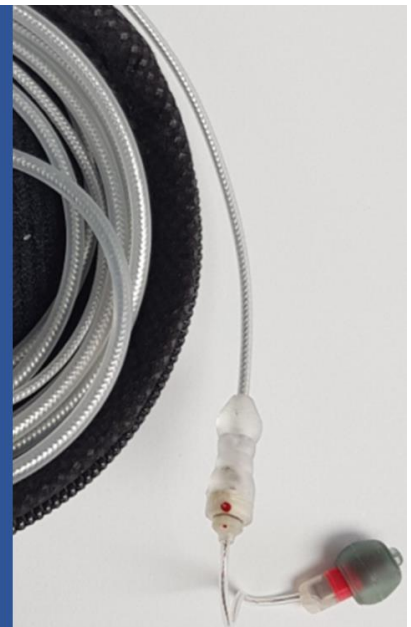

invisicom

- Virtually invisible on camera
- Exceptional sound quality and clarity
- Eliminates time consuming ear impressions
- Self-fitting kit in a range of sizes
- Configuration can be changed in seconds
- Hypo-allergenic material
- Options for all broadcasting situations: quiet, loud, studio or outside broadcast
- Fast, easy replacement if lost or damaged

Invisicom products use technology derived from the hearing aid industry to deliver sound directly into the ear canal via a small speaker that sits almost invisibly inside the ear canal

The speaker is held comfortably in place in the ear by a dome made of hypo-allergenic material. The size and type of dome can be selected from the kit: open for studio use or closed to block out noise

**Special Offer: £195 ex VAT each (Was £225 ex VAT)**
